Introduction on Sensors and Transducers

The Conference provides a unique opportunity for researchers and developers to share progress in sensor technologies, methods, applications, standardization and commercialization. Participants can exchange ideas and gain information on the sensors state of the art.

List of topics:

MEMS and NANO sensors	Robotics and automation
Smart sensor	Energy and smart grid
Novel sensing technologies	Smart cities and communities
Manufacturing process monitoring	Sensor networks
Sensor applications in food, and agriculture industry	Energy harvesting for sensors
Big Data	Eco sensor Industrial applications

Important Dates:

Submission of Paper: 15th August

Intimation of Acceptance: 4th September

Regular Registration: 8th September

Registration Fees (+GST applicable)

Regular Papers: Rs. 750

Foreign Delegates: \$50

**** The Selected Accepted papers will be published as Book Chapters in Scopus Indexed Book by Bentham ****

Venue: University of Engineering & Management, Kolkata

Mode: Hybrid
